

Engineering Grand Challenges

Cancer Detection

Advance health informatics

Hadron Collider

Engineer the tools of scientific discovery

Infant Brain Scans

Reverse-engineer the brain

Tokamak Plasma Control

Provide energy from fusion

IV Drift Pump

Engineer better medicines

Advanced Purification

Provide access to clean water

Haptics

Enhance virtual reality

Olympic Stadium Safety

Restore and improve urban infrastructure

CO₂ Storage

Develop carbon sequestration methods

Distance Learning

Advance personalized learning

Cheap Solar Panels

Make solar energy economical

Material Monitoring

Prevent nuclear terror

Spectral Monitoring

Secure cyberspace

Costa Rica Rain Forest

Manage the nitrogen cycle

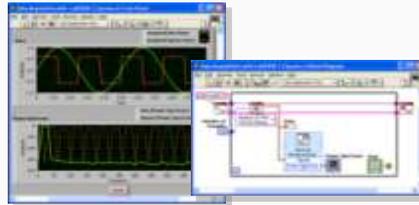

National Instruments – What We Do

NI combines graphical system design software with modular hardware, leveraging the latest technologies.

Low-Cost Modular Measurement and Control Hardware

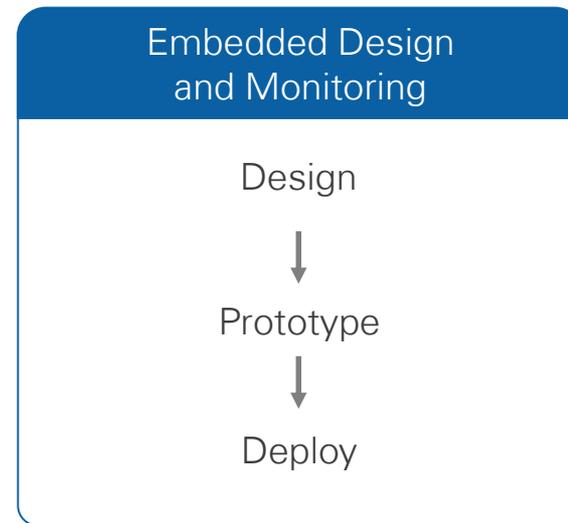

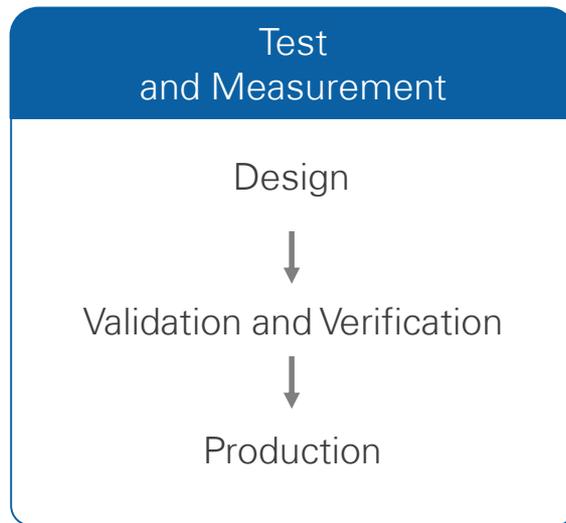

Productive Software Development Tools

Highly Integrated Systems Platforms

Key Applications

Our Customers

Advanced Manufacturing

Aerospace and Defense

Consumer Electronics

Wireless

Energy

Transportation
